

Deepikaa APA - WebTree Global Assignment - Profile Card

Deployed URL Link : <https://profilecard-react.netlify.app/>

Code Link : <https://github.com/DeepikaaAPA/ProfileCard>

Dependencies:

1. Tailwind CSS
2. Axios

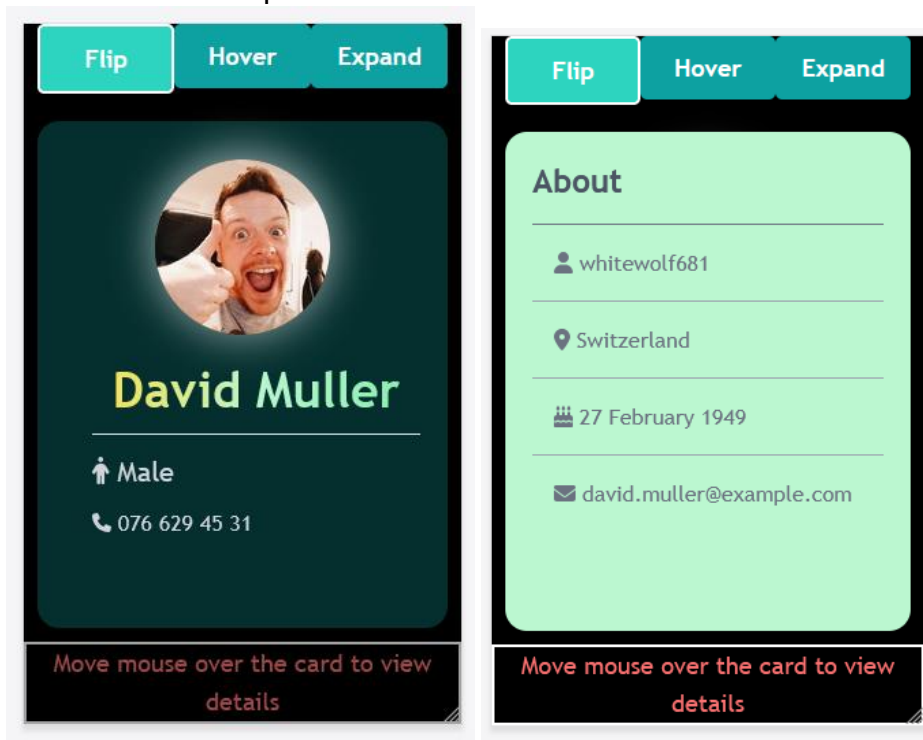

Features:

1. Designed using [Tailwind CSS](#).
2. [Responsive](#) web design.
3. [Conditional styling](#) of gender - pink for female and gray for males and [conditional rendering](#) of the gender icon.
4. Gradient text color to display the name.
5. Used [axios](#) for fetching data from API.
6. [Implemented 3 styles](#) of profile cards:
 - a. **Flip** - When mouse is hovered over the card, it flips to show the details on the backside through [flip animation](#).
 - b. **Hover** - When mouse is hovered over the card, details of the user are shown in a card beside.
 - c. **Expand** - A button at the bottom of the card when clicked [toggles the visibility](#) of details card.
7. Animated shadow effect for the profile card and [Toggle button](#) to show/hide details in the Expand style card.
